Designed in Barcelona

— Synthetic Leather Protector

Spray especially designed for synthetic leather and leather with metallic finishes. Thanks to its formula, with a waterproof and dirt repellent effect, you can protect your shoes and garments from snow, water or dirt.

Surfaces

SYNTHETIC LEATHER

Use

PROTECTS

Garments

— Description

This protector offers a waterproof and dirt repellent effect thanks to its formulation based on nanotechnology. When Synthetic Leather Protector has been applied on shoes and garments, water and dirt will not adhere to the fibers, sliding down like pearls instead (called the “lotus effect”). Material stays breathable and, when regularly used, their surface stays looking like new for longer.

— Characteristics

- Colorless spray.
- Apply 2 to 3 layers. Only apply a very thin layer to leathers with metallic finishes.
- Use in ventilated areas.
- In average weather conditions the durability of the product is five weeks.
- Synthetic Leather Protector is in accordance with the updated legislation on health, safety and environment. Not made with nanoparticles that could people’s harm health. According to Guidance for Industry Recommendations on Waterproofing Aerosols in order to Minimize Consumer Inhalation Toxicity Risk, the polymer contained in the formulation of the Synthetic Leather Protector was approved in the TNO (Netherlands Organization for Applied Scientific Research) test of toxicology inhalation suggested by EU with a particle size $\geq 4\mu\text{m}$. (micrometers).
